

VISIBILITY ARCHITECTURE IN ACTION

How Jones Plumbing Plus Outranked Reece and Turned Invisible Into Unmissable

A 73-year-old plumbing supplier in regional NSW was spending on TV and radio ads while plumbers outranked them in their own category. Within months of applying the REVIEW Method, they held 66.9% Share of Voice, beat Reece in local search, and generated \$19,200 in equivalent ad spend - every 31 days.

WHERE JONES PLUMBING PLUS STARTED

A 73-Year Business That Google Could Not Find

Jones Plumbing Plus is not a new business. It has served the Corowa region for 73 years - supplying plumbers, builders, renovators and homeowners with everything from tapware and fixtures to full bathroom and kitchen showroom support. When the business opened a new showroom in Albury, the team did what most established businesses do. They invested in a grand opening. TV ads. Radio ads. A new website.

None of it moved the needle on foot traffic or sales enquiries. The reason was not the product. The reason was not the team. The reason was that Google had no idea who Jones Plumbing Plus was in Albury - and neither did any AI system, directory, or local discovery surface that a customer might use before walking through the door.

"Despite investing in TV and radio ads for their grand opening and launching a new website, Jones Plumbing Plus was struggling to attract local customers to their new Albury showroom. Google had no idea who they were or what they sold."

REVIEWLY VISIBILITY DIAGNOSIS - JANUARY 2024

THE SPECIFIC PROBLEMS IDENTIFIED

14th

LOCAL RANKING POSITION
AT STARTING POINT

Plumbers outranked a plumbing supplier

3.6

GOOGLE TRUST SCORE
AT STARTING POINT

2 reviews. 1 star unresponded.

THE CORE PROBLEM

Jones Plumbing Plus had 73 years of real-world trust. The business had product range, staff knowledge, and a genuine showroom offer. The problem was that none of that trust existed in a form that Google, Maps, or AI systems could read, validate, or recommend. The digital structure was invisible. The Google Business Profile was unverified. The keyword cluster was near empty. The website had indexing issues that meant key pages were not being read by search systems at all.

The business was also competing in a category where customers often call directly from a Google Business Profile result - before they visit a website, before they compare prices, before they walk in. If the profile is not visible, those calls go to a competitor. In Albury, at the starting point, they were going to plumbers.

WHAT WAS MISSING

- 1 Google Business Profile not verified or actively managed
- 2 Incorrect business category code assigned
- 3 Website indexing issues blocking key pages from Google

WHAT WAS ALREADY STRONG

- 1 73 years of real-world operational history
 - 2 Physical showroom with genuine product range
 - 3 Staff knowledge and trade buyer relationships
- Two locations - Albury and Corowa

HOW REVIEWLY APPLIED THE REVIEW METHOD

Turning 73 Years of Real Trust Into Visible Trust

The REVIEW Method is Reviewly's proprietary framework for building brand visibility that earns trust and recommendation in modern search environments. For Jones Plumbing Plus, the work was not about creating something new. It was about making what already existed legible to Google, Maps, AI systems, and the customers who use them.

R	RECOGNISED	Clarified Jones Plumbing Plus as a local plumbing supply, showroom and trade support business across Albury and Corowa. Corrected the business category code. Established clear positioning for both locations.	Search systems and customers could now understand what the business does, who it serves, and where it operates - reducing the misclassification that had been costing them local ranking.
E	ESTABLISHED	Strengthened Google Business Profile activity, social posting, website content pathways and local performance monitoring for both Albury and Corowa locations.	The business showed active, operational signals across the surfaces customers use before contacting a supplier - not just a passive listing.
V	VERIFIED	Worked through page indexing issues, supported location-specific GBP evidence and kept business information aligned across discovery surfaces. Addressed indexing failures that had been blocking key pages.	Reduced friction for Google and customers by making the business easier to validate. Key commercial pages became readable and rankable.
I	INFLUENTIAL	Reactivated visible review momentum. Supported review response strategy. Continued educational social content that demonstrated product knowledge and showroom value.	Customers gained fresher proof that real people are still choosing and engaging with the business. Trust score moved from 3.6 to 4.6 within 30 days.
E	ENDURING	Created an ongoing system for monitoring search, GBP calls, profile interactions, social presence, review activity and indexing health across both locations.	Built a foundation that compounds across Albury, Corowa and surrounding search demand - not a one-time fix that fades.

THE KEY INSIGHT

Jones Plumbing Plus was not only competing for rankings. It was competing for clarity at the point of local decision-making. A customer may see the Business Profile, the Facebook page, a review reply, a product post or a search result before they ever walk into the showroom. Once the business information, profile actions, review response, educational content and indexing work began pointing in the same direction, the brand became easier to understand and easier to act on.

BEFORE AND AFTER - LOCAL RANKING GRID

From Invisible to Dominating the Region

The local ranking grid maps how a business appears across a geographic area for its primary search term. Red positions (10+) mean the business is effectively invisible to customers in that suburb. Green positions (1-3) mean the business is the first result a customer sees. The transformation below is the visual proof of what the REVIEW Method delivers.

BEFORE (Left): Positions 10-20+ across the entire Albury-Wodonga region. Plumbers outranking a plumbing supplier. Google could not identify the business category. | **AFTER (Right):** Positions 2-6 across the northern half of the region. Green coverage across Jindera, Ettamogah, Springdale Heights and surrounding suburbs.

WHAT THE BEFORE GRID TELLS US

The left grid shows a business that Google ranked at position 14 at its own pin location - meaning even customers standing near the showroom searching for plumbing supplies would not see Jones Plumbing Plus in their results. The red coverage across the entire region confirms that the business had no local search presence in Albury at all. Every customer searching in Lavington, Thurgoona, Springdale Heights or Wodonga was being directed to competitors.

WHAT THE AFTER GRID TELLS US

The right grid shows positions 2-3 appearing in green across the northern suburbs of the region - the highest-density residential areas where renovators, homeowners and trade buyers are concentrated. The pin location moved from 14 to 10, and the surrounding grid brightened significantly. Customers in Jindera, Table Top and Ettamogah now see Jones Plumbing Plus as a top result.

MAY 3 - JUNE 2, 2026 | 31-DAY SNAPSHOT

\$19,200 in Equivalent Ad Spend. Every Month.

The savings figure represents the equivalent cost of buying the traffic Jones Plumbing Plus now receives organically through paid advertising. This is not a projection. It is a direct measurement from the tracking dashboard against current keyword cost-per-click rates in the plumbing supply category.

TOTAL EQUIVALENT AD SPEND SAVED - 31 DAYS

\$19,200

This is what Jones Plumbing Plus would need to spend on Google Ads to buy the same volume of traffic they now receive for free through organic search visibility.

VISIBILITY SCORE VS COMPETITORS

Outranking **Reece** in Their Own Market

Jones Plumbing Plus now holds more than double the visibility of Reece - a national chain with significantly greater resources - across the 90 tracked keywords in the Albury-Corowa market. This is not a minor improvement. Reece operates nationally with a dedicated digital marketing team. A regional independent supplier outranking them in their own local market is a direct result of structured, consistent visibility work applied through the REVIEW Method.

Visibility Score Comparison: Jones Plumbing Plus (60) vs Reece - www.reece.com.au (28) vs SP Plus - spplus.com.au (15). Source: Reviewly competitor tracking, June 2026.

WHAT THIS MEANS FOR OTHER PLUMBING SUPPLIERS

If a regional operator with a new Albury showroom can hold 66.9% Share of Voice and outrank Reece across 90 keywords, the same outcome is achievable for any plumbing supplier in any Australian market. The gap between where most suppliers sit today and where Jones Plumbing Plus sits now is not a gap in product range, staff quality or customer service. It is a gap in digital visibility structure. That gap is closeable.

GOOGLE BUSINESS PROFILE PERFORMANCE

583 Calls. Real Customers. Real Enquiries.

For a showroom and trade supplier, calls are the highest-intent action a customer can take from a Google Business Profile. They are not passive impressions. They are customers who found the business, evaluated it, and decided to make contact. From January to May 2026, Jones Plumbing Plus received 583 calls directly from their Google Business Profile - up 19.7% on the same period the previous year.

METRIC	RESULT	CHANGE	WHY IT MATTERS
GBP Calls (Jan-May 2026)	583 calls	+19.7%	Direct customer contact from profile discovery
Business Profile Interactions	1,361 interactions	+5.9%	Calls, website visits, directions, bookings
Albury GBP Calls (March 2026)	128 calls	+12%	Strong action from the new Albury location
Corowa GBP Calls (March 2026)	98 calls	+84%	Exceptional growth from the established location
Albury Profile Views (March 2026)	841 views	+19%	More customers evaluating the Albury showroom
Corowa Profile Views (March 2026)	392 views	+42%	Corowa visibility compounding strongly

GOOGLE SEARCH CONSOLE - SIX MONTH COMPARISON

The Search Console data shows a business whose search footprint became more focused and more efficient. Average position improved from 25.5 to 18.1. Click-through rate improved from 1.4% to 1.8%. The slight drop in total impressions reflects a cleaner, more targeted search presence - the site appeared less often for irrelevant broad queries and more often for the commercial terms that actually drive customer action.

METRIC	PREVIOUS 6 MONTHS	LAST 6 MONTHS	CHANGE
Total Clicks	1.95K	2.02K	+70 clicks / +3.6%
Average CTR	1.4%	1.8%	+0.4 percentage points
Average Position	25.5	18.1	+7.4 positions better
Total Impressions	141K	112K	-20.6% (quality improvement)

WHAT THE IMPRESSION DROP ACTUALLY MEANS

A drop in impressions alongside an improvement in position and CTR is a positive signal. It means the website stopped appearing for broad, irrelevant queries and started appearing more reliably for the specific commercial terms that drive calls and showroom visits. The search footprint became more precise, not smaller.

FOR PLUMBING SUPPLIERS READING THIS

If Customers Already Trust You Offline, You Are Leaving Money on the Table

Jones Plumbing Plus already had 73 years of real-world trust. The product range was there. The staff knowledge was there. The showroom was there. What was missing was a digital structure that made all of that trust legible to Google, Maps, and the AI systems that now influence where customers go before they ever walk through a door.

The REVIEW Method does not create trust that does not exist. It makes the trust you have already earned visible, verifiable, and recommendable - by customers and by the AI systems they increasingly rely on to make decisions.

WHAT A VISIBILITY AUDIT SHOWS YOU

Where you currently rank across your local area for your primary category terms

What AI systems currently say about your business when customers ask

What trust signals are missing from your Google Business Profile and website

What your competitors are doing that you are not - and how to close the gap

The equivalent ad spend value of the organic traffic you are currently missing

WHAT HAPPENS AFTER YOU BOOK A VISIBILITY AUDIT

01 Audit Delivered in 48 Hours

You receive a full breakdown of your current local search position, AI visibility status, GBP health, and the equivalent ad spend value of your missing organic traffic.

02 Strategy Session

We walk through the audit findings and show you exactly where the gaps are, what competitors are doing that you are not, and what the REVIEW Method would look like applied to your business.

03 Decision is Yours

No lock-in. No pressure. If the numbers make sense for your business, we start. If they do not, you keep the audit and the insights at no cost.
